

Final Reveal!

Lay out your blocks in a checkerboard pattern and sew together.

Now, let's Two Step! You'll be making some flying geese for the first border to finish off the points. Determine the number of flying Geese units you need. In this example I'll go over the 5x6 placement of the blocks for the quilt as

shown above. If you are making a different size, your totals will be different. But not to worry, I'll show you how to figure it out. Note that the upper corners will be different than the lower corners due to Block A being both ends of one, and Block B on the other. You'll need to do the flying geese, then cut the strips as shown for the rest of the border.

Use the quick no waste method to make 4 at a time. Cut 4 small squares 3-3/8", and 1 large square 5-3/4" for each 2 flying geese needed. In this example, we'll make 12, and one will go to the scrap bin. Square up to 4-1/2 inches x 2-1/2 inches.

Now, lay out your flimsy, and your fabric strips with flying geese to be sure you have all the bits you need.

Background strips needed for fill in the blanks with your numbers as you count the block edges on the flimsy. Do some measuring to make sure you have the right number of strips in each size.

_____ strips 20-1/2 x 2-1/2 between the flying geese in the border middles

_____ strips 16-1/2 x 2-1/2 between the flying geese and the corners around the square block units

_____ strips 2-1/2 x 12/12 and 2 strips 2-1/2 x 14-1/2 for the bottom corners

_____ strips 2-1/2 x 4/12 and 2 strips 2-1/2 x 6-1/2 for the top corners

Sew border strips for top and bottom, then add sides. Add additional borders as desired. Quilt as desired and bind in the usual way.
