Let's Square Dance!! To begin, we will Bow to Your Partner, Bow to Your Corner - in other words, greet your fellow dancers - your fabric and rotary cutter!!

Fabric Requirements -
Knowing that some will have leftover precuts to use, and that some may not have any stash, I'll give you some guidelines for the total number of precuts you'll need. Supplement with fat quarters and bits from stash for any shortages. This is just an idea, I ran out of time to do all the sizes.

New quilters without a stash, you can also do this quilt with fat quarters. Here's what you need. This chart was all done with math, and I haven't cut using these numbers, so let me know if you use this chart and you don't have enough. Again, I didn't have time to do all the sizes, this is just an idea.

Grab your stash bins and dig out a wide variety of scraps for cutting.

Print out only page two for your cutting table to save paper and ink.

January Cutting Instructions

Important Cutting and Fabric Notes –
1. For Fabric Cut A, make these all the same fabric, not scrappy. For all other cuts, scrappy works best.
2. The higher the contrast between Fabric A and the Scrappy Dark/Medium, the better the final design will look.
3. You can use jelly roll strips and charm squares for Cuts D & E, but don't cut these into squares this month, I'll show you how to use them more efficiently when we get to those cuts.
4. This design will not do well with black substituted for the light. If you want to use black prints, use them as the darks.

Cutting Instructions - Cut the following squares and rectangles for your chosen size.
